CONTENTS

No. 1 MAY 1950

HARRY J. DEUEL, JR. Biography of Graham Lusk, with frontispiece 3

JAMES H. SHAW. Effects of dietary composition on tooth decay in the albino rat 13

H. G. BAROTT AND EMMA M. PRINGLE. Effect of environment on growth and feed and water consumption of chickens. III. The effect of temperature of environment during the period from 18 to 32 days of age. Two figures 25

J. A. REYNIERS, P. C. TREXLER, R. F. ERVIN, M. WAGNER, H. A. GORDON AND T. D. LUCKEY AND R. A. BROWN, G. J. MANNERING AND C. J. CAMPBELL. Germ-free chicken nutrition. I. Gross development and vitamin utilization studies employing White Leghorn chicks. One figure 31

WISE BURROUGHS, B. H. EDGINGTON, W. L. ROBISON AND R. M. BETHKE. Niacin deficiency and enteritis in growing pigs. One figure 51

CAREY, D. MILLER. Enamel erosive properties of fruits and fruit juices 63

ORLANDO OLCESE, J. R. COUCH AND CARL M. LYMAN. Vitamin B_{12} concentrates in the nutrition of the mature domestic fowl. Five figures 73

C. R. GRAU AND M. KAMEI. Amino acid imbalance and the growth requirements for lysine and methionine. Two figures 89

M. O. SCHULTZE. Nutritional value of plant materials. I. Growth of rats on purified rations containing soybean protein 103

M. M. KRIDER AND N. B. GUERRANT. Some interrelationships of thiamine and fat in the nutrition of the rat. Three figures 115

D. MARK HEGSTED AND GWELDA S. MCPHEE. The thiamine requirement of the adult rat and the influence on it of a low environmental temperature. Two figures 127

FRANCES A. JOHNSTON, DORETTA SCHLAPHOFF AND THELMA MCMILLAN. Calcium retained from one level of intake by six adolescent girls 137

R. O. NESHEIM AND B. CONNOR JOHNSON. Effect of a high level of methionine on the dietary choline requirement of the baby pig 149

F. H. KRATZER. The activities of D and L lysine for turkey poults 153

W. A. KREHL, DAVID BONNER AND CHARLES YANOFSKY. Utilization of niacin precursors and derivatives by the rat and Neurospora. One figure 159

No. 2 JUNE 1950

E. M. Scott, Ethel L. Verney and Patricia D. Morissey. Self selection of diet. X. Appetites for sodium, chloride and sodium chloride. One figure 173

E. M. Scott, Ethel L. Verney and Patricia D. Morissey. Self selection of diet. XI. Appetites for calcium, magnesium and potassium. Two figures 187

Albert G. Hogan, William O. Regan and William B. House. Calcium phosphate deposits in guinea pigs and the phosphorus content of the diet. Four figures 203

David Kligler and W. A. Krehl. Lysine deficiency in rats. I. Studies with zein diets. Four figures 215

Helen Oldham, Bernice Blum Sheft and Thelma Porter. Thiamine and riboflavin intakes and excretions during pregnancy. Three figures 231

M. K. Horwitt, C. C. Harvey, O. W. Hills and E. Liebert. Correlation of urinary excretion of riboflavin with dietary intake and symptoms of ariboflavinosis 247

Paul György, Catharine S. Rose, R. M. Tomarelli and Harry Goldblatt. Yeast in the production of dietary massive hepatic necrosis in rats 265

Hiroshi Nishi, Tsoo E. King and Vernon H. Cheldelin. Pantothenic acid studies. IX. The influence of dietary pantothenic acid upon a pantothenic acid conjugate (PAC) in rat tissues. One figure 279

Maurice E. Shils and Leonard J. Goldwater. The effect of diet on the susceptibility of rats to poisoning by 2, 4, 6-trinitrotoluene (TNT). Two figures 293

Dorsey E. Holtkamp and Robert M. Hill. With the technical assistance of Lydia Toll and Evelyn Campbell. The effect on growth of the level of manganese in the diet of rats, with some observations on the manganese-thiamine relationship. Two figures 307

H. H. Mitchell, B. Connor Johnson, T. S. Hamilton and W. T. Haines. The riboflavin requirement of the growing pig at two environmental temperatures. Three figures 317

Raymond Borchers and C. W. Ackerson. The nutritive value of the legume seeds. X. Effect of autoclaving and the trypsin inhibitor test for 17 species 339

No. 3 JULY 1950

Henry S. Wyzan, Charles F. Kade, Jr. and Jessy R. Shepherd. Amino acid supplementation of proteins and protein hydrolysates. Four figures 347

Robert M. Hill, Dorsey E. Holtkamp, A. R. Buchanan and Enid K. Rutledge. Manganese deficiency in rats with relation to ataxia and loss of equilibrium. Two figures 359

E. M. Scott, Ethel L. Verney and Patricia D. Morissey. Self selection of diet. XII. Effects of B vitamin deficiencies on selection of food components 373

R. J. Sirny, I. T. Greenhut and C. A. Elvehjem. The arginine and histidine content of meats 383

Kaare Rodahl. Hypervitaminosis A in the rat. Eighteen figures 399

Orlando Olcese, J. R. Couch, J. H. Quisenberry and P. B. Pearson. Congenital anomalies in the chick due to vitamin B_{12} deficiency. Two figures 423

Leon M. Sharpe, Wendell C. Peacock, Richard Cooke and Robert S. Harris. With the technical assistance of Helen Lockhart, Helen Yee and Gertrude Nightingale. The effect of phytate and other food factors on iron absorption. Two figures 433

William T. Beher and O. H. Gaebler. Observations on niacin, riboflavin, allantoin, ascorbic acid, and vitamin A during anabolism induced by hormones 447

Aaron Arnold and Frans C. Goble. Observations on the prolonged feeding to rats of the flour maturing agent, ammonium persulfate. Two figures .. 459

Samuel M. Greenberg, Clarence E. Calbert, Evelyn E. Savage and Harry J. Deuel, Jr. The effect of fat level of the diet on general nutrition. VI. The interrelation of linoleate and linolenate in supplying the essential fatty acid requirement in the rat. Four figures 473

Earle W. Crampton and Lewis E. Lloyd. A quantitative estimation of the effect of rutin on the biological potency of vitamin C. One figure 487

Waldemar Dasler. With the technical assistance of Eleanor M. Cordes. The effects of excess tryptophan and excess lysine on the production of rickets in the rat. One figure 499

No. 4 AUGUST 1950

Arthur B. Decker, Dorothy L. Fillerup and James F. Mead. Chronic essential fatty acid deficiency in mice. Five figures 507

Hellen Linkswiler and May S. Reynolds. Urinary and fecal elimination of B_6 and 4-pyridoxic acid on three levels of intake 523

Alva B. Watts, Walter Swank, Ray J. Ohman, O. B. Ross and Robert W. MacVicar. The effect of supplementation of high corn diets on rat reproduction and lactation 533

Alvin R. Lamb. With the technical assistance of Robert Nakamura. On the relative nutritional efficiency of sucrose and glucose in the albino rat ... 545

E. R. Halbrook, Fay Cords, A. R. Winter and T. S. Sutton. Vitamin B_{12} production by microorganisms isolated from poultry house litter and droppings 555

Remzi Gurcay, R. V. Boucher and E. W. Callenbach. Utilization of vitamin A by turkey poults. I. Crystalline carotene, crystalline vitamin A acetate and "Black Cod" liver oil. Four figures 565

E. A. Kane, W. C. Jacobson and L. A. Moore. A comparison of techniques used in digestibility studies with dairy cattle 583

Esther Da Costa and Ruth Clayton. Studies of dietary restriction and rehabilitation. II. Interrelationships among the fat, water content and specific gravity of the total carcass of the albino rat. Two figures 597

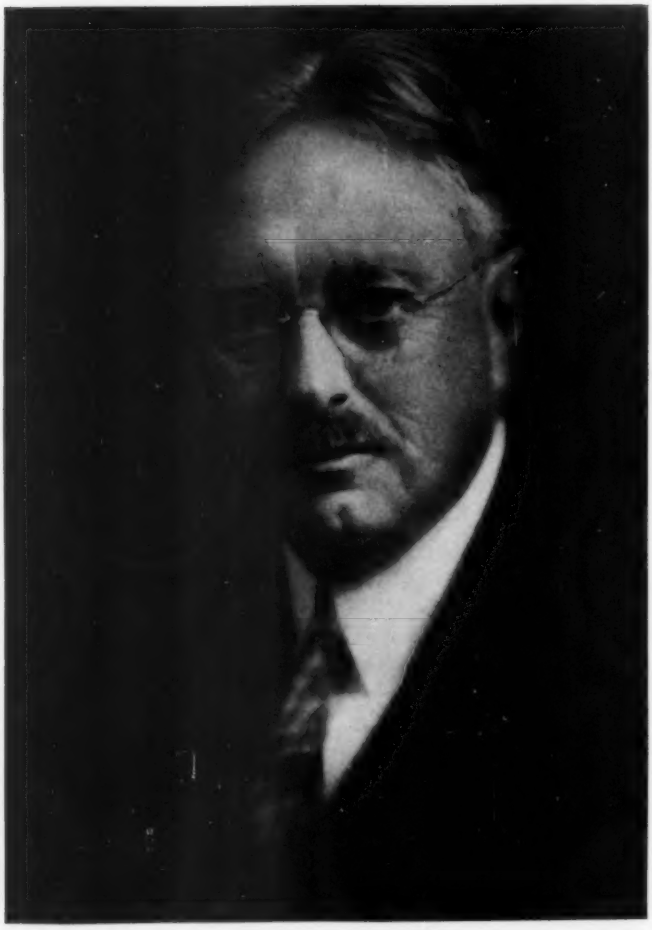
E. S. Nasset and Joseph T. Anderson. The N balance index of low-valine amino acid mixtures and of whole egg protein in the adult rat. Three figures 607

Amber L. S. Cheng and Harry J. Deuel, Jr. Studies on carotenoid metabolism. X. The site of conversion of carotene to vitamin A in the chick ... 619

A. F. Schürch, L. E. Lloyd and E. W. Crampton. The use of chromic oxide as an index for determining the digestibility of a diet. Two figures 629

GRAHAM LUSK

1866–1932



Graham Lusk.
